

## - PRESS RELEASE -

Krailling, october 2021

### **Javier González Moreno joins the sales team at InnoLas Solutions**

Starting in October, Javier González Moreno joins InnoLas Solutions as Senior Sales Manager in the Electronics division. From 2013, he contributed as an application engineer at LPKF Laser & Electronics AG, in process development, in the field of laser micromaterial processing for electronics manufacturing. Most recently, he further expanded his expertise as Sales Manager in the area of laser production equipment for electronics manufacturing since 2017.

He now brings his experience to the Krailling plant. "Javier González is one of the proven experts in this specific field within the market. I am very much looking forward to his competent reinforcement of our team," says CSO Lars Ederleh, at InnoLas Solutions.

Innovative laser technologies as well as customer-specific equipment and process solutions in the field of micromaterial processing are part of InnoLas Solutions' core business. For Javier González Moreno, this is familiar territory with new omens: "I am excited about the processes we can initiate at InnoLas Solutions. With my long experience in laser processes for electronics manufacturing, coupled with InnoLas Solutions' great technical solutions, I see enormous potential for the successful implementation of many projects in the field of depaneling and laser drilling. In particular, I'm excited about the dynamic team, whose collaboration I expect to see a lot of."

#### About InnoLas Solutions

InnoLas Solutions stands for innovative laser technologies, customized equipment and process solutions, and the highest quality and productivity. Specializing in the field of micro material processing, InnoLas Solutions develops and produces high-precision laser applications for customers in the photovoltaic, electronics as well as semiconductor industries. The company looks back on over 25 years of experience in laser technology and since May 2018 has been part of the Photonics Systems Group, a market leader in laser systems for micromaterial processing, which employs around 120 people\* worldwide.
